

# CORRECTIONAL MARKET

## Stainless Steel Replacement Toilets

These stainless steel fixtures match rough-in dimensions for **most** existing vitreous china toilets in commercial, industrial and institutional settings—any environments that require a durable, cost-effective and hygienic product. These durable units meet the high-use demands of correctional environments, where damage to vitreous china can be a hazard to building occupants. Stainless steel withstands greater pressure and force without cause for replacement, putting an end to the vicious cycle of vitreous. The results are fewer safety risks and replacement costs, with a greater long-term savings in maintenance and repair for customers.

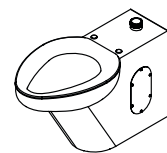

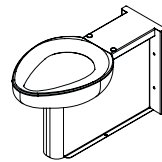

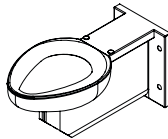

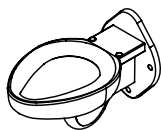

### Acorn's Duraware® Retrofit Toilets (Shown in Stainless Steel)

Units are front-mount only and are available in four models, each with top or wall supply options:

Model R2100-W-1

- Heavy Duty for high traffic applications
- 16-gage, type 304 recycled stainless steel
- Stainless Steel or optional white Enviroglaze finish available
- Water Savings! All toilets can accommodate 1.28 GPF, 1.6 GPF, or 3.5 GPF flushometers - no modifications required.
- In stock and **ready to ship!**
